[DARSH.DHILLON@LIVE.COM](mailto:DARSH.DHILLON@LIVE.COM)

Experienced professional in carpentry and manufacturing. Currently self employed and seeking become a full stack developer with an emphasis on back end logic development.

## Work history

### **Personal registered business**

**Canada12354 inc. - Brampton, ON**

**May 2020 to present time**

- I worked per project basis in the construction and finishing industry.
- My work required me to follow leads, meet with customers, draft drawings and create quotes.
- I worked with various material such as wood, glass, acrylics and alloys to form parts that are later assembled into final products.
- Some examples include cabinetry, walls, vinyl floors, custom objects and furniture, plumbing and more.
- I also built larger structures, such as precut playground consisting of over a 1000 parts and custom decks and gazebos etc..

## **Salzburg interiors & furniture ltd**

**August 2021 – November 2021**

Position: industrial wood worker and assembler.

- I assembled cabinets and millwork to form final products by following to architectural drawings.
- I used tools such as drill, driver, table saw, hand tools, adhesives, screws, nails and additional hardware.

## **Green Valley Wood Working – Bolton, ON**

**July 2015 to August 2016**

Green valley wood working was mid-business that dealt with both residential and commercial jobs at the time. I was one of four cabinet makers with my personal workspace, and it was great. Day to day activities included:

- reading drawings, finding parts and assemble.
- Building cabinets using various fastening techniques such as using nails to hold the cabinet in place and then screwing it down once the shape is formed.
- Laminating cabinets using various materials, trimming using a power router, filing sharp edges, installing hardware and doors, and go out to do installations at work sites.
- On occasions I had to setup a table saw, make cuts, create joints and clean up afterwards.
- When the product was finished, I helped move the various products into a truck and strap it down for to be shipped to the work site.
- My main position was in shop.

**OWC - Mississauga, ON**

**May 2014 to August 2015**

### **CNC Operator**

I was responsible for three 3-axis flat bed CNC router machines and an edge-bander. The 3-axis CNC cut shapes and parts out of a material and the edge bander finished of the edges.

Among other day to day tasks included keeping my workspace safe, organized and optimize the cutting code on the go to gain better yield or efficiency through the operating system.

A few other responsibilities included scheduling waste pick-ups, troubleshooting machinery, and helping others.

## Education

### **Centennial college**

January 2022 -December 2023

### **Software engineering technology**

May 2020

AEC / DEP or Skilled Trade Certificate in Motive power tech 8202

Centennial college - Toronto, ON

September 2018 to April 2020
